- 20x228L / 1207 Gal.
- 25x228L / 1509 Gal.

Medium Long

TOASTING LEVEL

[OUR RECOMMENDATION]

A Round Cask is an ideal vessel for fruit-driven wine lots that you do not want impacted by too much oak extraction. The wine aged in such large format cask retains all its freshness and mineralite while developing weight and complexity wines to consider: Syrah, Pinot Noir, Grenache, Mourverde, Carignane, Barbera, Sangiovese

Large format vessel toasting has a very distinct process that lasts over 8 hours. This toasting is purely mechanical and does not equate the toasting level of a regular size barrel

For wineries concerned with space and capacity storage, the oval shape of the cask will make sense. The higher height of the oval cask will also enhance the pressure on the lees, particularly suited for white wines fermentation and maturation: Chardonnay, Sauvignon Blanc, Riesling, Gewurtztraminer, Pinot Gris, Viognier, Roussane, Marsane.
