

Biopythos  
C ramique innovante

## Porcelain jar 500 litres

This product is intended for the production of wine and it will meet your expectations of freshness and authenticity. It is made with a **very resistant porcelain**.

It suits particularly with white-skinned grape varieties and delicate red-skinned varieties due to the perfectly controlled porosity (<2%), leading to limited micro-oxygenation.

- Smooth interior for easy cleaning and sanitizing
- Inert ceramic to chemical and climatic aggressions
- Long lifespan

### Specifications

High	Diameter	Opening diameter	Weight	Permeability	Capacity
